

HILLARY WIDANAMA ADARE

Agri-Tech Entrepreneur · AI/GIS Product Leader · MSc Candidate

+44 7745 333703 · widanama@gmail.com · United Kingdom

Profile

Agri-tech entrepreneur and geospatial analyst specialising in applied AI, computer vision and GIS for precision agriculture. Founder of Wonfliki, building drone-based remote sensing, predictive analytics and alternative credit-scoring products for smallholder farmers. Experienced across the full product lifecycle: data pipeline design, machine learning model development, GIS platform engineering, and partnership delivery with government and financial institutions. Recognised internationally for leadership and innovation, including as a Mandela Washington Fellow and Chevening Scholar.

Relevant Technical & Product Experience

Founder & CEO — Wonfliki

2019 – Present

- Built an agri-tech platform integrating drone data, GIS and predictive analytics for farm monitoring, combining computer vision, remote sensing and machine learning to translate raw imagery into actionable farm-level decisions.
- Designed and shipped data pipelines for NDVI analysis, soil moisture estimation, yield prediction and pest risk modelling — the core AI/ML product layer of the platform.
- Co-developed a digital credit-scoring system for smallholder farmers under the LINC programme (US Department of State / IREX), applying alternative data and predictive modelling to financial inclusion; the programme trained approximately 20 farmers across 2 districts in Ghana's Eastern Region.
- Secured new clients for Wonfliki, expanding the platform's service coverage to over 15,000 acres of smallholder farmland in Ghana.
- Secured a \$25,000 grant under the Absa–Mastercard Foundation programme (2023) to support Wonfliki's product development and market expansion.
- Managed partnerships with financial institutions, farmer groups and agri-value-chain actors across Wonfliki's operating regions.

Head of R&D & E-commerce Manager — Hexagram Company Ltd

2020 – 2023

- Led research and development for software products and digital business strategy.
- Managed the e-commerce portfolio and optimised product-market fit.

Junior Survey Officer — Ghana Grid Company Limited

2017 – 2018

- Supported land acquisition, mapping and spatial data collection for national infrastructure projects.

Software & Content Development Intern — Wineloya Digital

2017

- Assisted in digital training programmes and online solutions development.

Key Digital Technology Projects

- Computer vision model for drone-based deer monitoring at a UK conservation site — object detection applied to wildlife population tracking.
- GIS Web Mapping Platform — interactive spatial visualisation tool built with Leaflet, HTML, CSS and JavaScript.
- Farmer Credit Scoring Model — machine-learning-based financial inclusion system built on alternative agricultural data.
- Farmer and Youth Skill Training and Development Project — technology and digital-skills training delivered across 4 national districts in Ghana.
- Adwumawura Programme (Government of Ghana) — led capacity-building engagement with youth and project participants in the Bole and Sawla districts (Northern Region); several participants subsequently secured government funding following the programme.
- E-commerce software product build and management, Hexagram Company Ltd.
- Geomatic Engineer, Ghana Accra Sewerage Improvement Project (2016).

Education

- MSc Agricultural Technology and Innovation — Royal Agricultural University (Expected 2026)
- MPhil Geographic Information Systems — KNUST (Expected 2026)
- Leadership in Business — Purdue University (2023)
- BSc Geomatic Engineering — KNUST (2017)

Publication

- “3-D Biostereometrics Modeling for Reconstructive Surgery” — published journal article, BSc final-year research project.

Awards & International Recognition

- 2026 Nominee, Schöffel Countryside Awards
- 2026 Nominee, Farmers Weekly Awards
- 2025 Chevening Scholar
- 2024 Recipient, 10 Faces Changing Africa Award — Ghana Edition (StarAfrica, Germany-Africa)
- 2024 Award Recipient, Womenpreneur Tour Africa
- 2024 LINC Grant Recipient (US Department of State / IREX)
- 2023 Mandela Washington Fellow

Professional Memberships

- Member, British Ecological Society

Technical Skills

ArcGIS · QGIS · Python · R · SQL · AutoCAD · Agisoft Metashape · Google Earth Engine · PostgreSQL/PostGIS · HTML/CSS/JavaScript · Drone Piloting · Machine learning & computer vision for remote sensing

Key Competencies

- Precision Agriculture & Remote Sensing (Drones, GIS, AI/ML)
- Spatial Data Analysis & Geostatistics
- Product Development & UX Thinking
- Agri-finance & Alternative Credit Scoring
- Cadastral and Engineering Survey
- Stakeholder Engagement & Partnerships
- Research, Monitoring & Evaluation
